Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: (i) glucosinolate or a derivative thereof and (ii) isothiocyanate or a derivative thereof. The species are independent or distinct because chemical structure of glucosinolate significantly differs from isothiocyanate and they are generally acquired a separate status in the art due to their different classification.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, for example sulforaphane from isothiocyanate, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 39-81 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. In addition, applicant is required under 35 U.S.C. 121 to elect a single disclosed species from (i) one agent (monotherapy) selected from glucosinolate, isothiocyanate or a derivative thereof, (ii) combination of one or more glucosinolate, isothiocyanate and/or a derivative thereof, (iii) one agent (monotherapy) selected from glucosinolate, isothiocyanate or a derivative thereof + antibiotics, (iv) one agent (monotherapy) selected from glucosinolate, isothiocyanate or a

derivative thereof + H₂ inhibitor, (v) combination of one or more glucosinolate, isothiocyanate and/or a derivative thereof + antibiotics and (vi) combination of one or more glucosinolate, isothiocyanate and/or a derivative thereof + H₂ inhibitor, for example sulforaphane monotherapy, under the instant claims of the elected Group. Moreover, whatever specific compound or combination is ultimately elected, applicants are required to list all claims readable thereon.

With the election of a specific exemplified compound or combination, a generic concept will be identified by the examiner as the inventive group for examination.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (571) 272-0581. The examiner can normally be reached Tuesday through Friday from 9:00 am to 7:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel, can be reached on (571) 272-0718. The fax number for this Group is (571) 273-8300.
